MOHAMED ELGHAMRY

Computer Engineering Graduate — AI & Machine Learning · Data Engineering

+974 3335 5035 | mksghamry20@gmail.com | Doha, Qatar | l1nk.dev/linkedinElghamry

Computer Engineering graduate with hands-on experience in deep learning and computer vision, data engineering/BI, and network engineering, paired with a strong track record of student leadership and large-scale event and project management. Built an award-winning deep learning system for agricultural disease detection (Gold Award, iNVENTX 2026) and delivered Power BI reporting during a PMO data engineering internship, while leading multiple university organizations and initiatives.

EDUCATION

Multimedia University (MMU), Cyberjaya, Malaysia *2021 – 2026*

Bachelor's degree in computer engineering

- Final Year Project in Deep Learning for precision agriculture — awarded Gold Award at iNVENTX 2026 (see below).

PROFESSIONAL EXPERIENCE

Aventra Group — Intern, PMO Data Engineering Officer *Jul 2025 – Oct 2025*

- Developed and maintained Power BI dashboards to support PMO reporting and data-driven decision-making.
- Cleaned, transformed, and prepared raw data for analysis; built DAX calculations and worked with Power BI semantic models.
- Used pivot tables and core BI techniques to analyze and summarize project and business data for stakeholders.
- Completed structured training in Power BI, project management fundamentals, cloud basics, GDPR, and information security.

FINAL YEAR PROJECT (CAPSTONE) / RESEARCH

TomatoLeafAI — Deep Learning Classification of Tomato Leaf Diseases for Precision Agriculture *2025 – 2026*

Final Year Project Researcher & Developer, MMU | Supervisor: Assoc. Prof. Dr. Hezerul Abdul Karim

- Designed and trained a deep-learning image classifier on ~16,000+ images across 10 disease classes, implementing and comparing EfficientNet-B2, MobileNetV2, and DenseNet121, and exploring ensemble learning to improve accuracy.
- Trained and tuned models on Google Colab GPU (learning rate 0.0001, batch size 16, across multiple epochs), reaching a reported 99.25% test accuracy.
- Applied Explainable AI (Grad-CAM) to visualize the leaf regions driving each prediction, improving model interpretability for agricultural end users.
- Authored a research paper associated with MECON 2026 / AIP Proceedings; presented a 25-slide capstone/final defense covering problem statement, architecture, results, and explainability, plus a condensed 3-minute technical pitch and project poster.
- Exhibited the project at iNVENTX 2026, presenting and demonstrating the system to judges and attendees.
- **Awarded the Gold Award at iNVENTX 2026.**

LEADERSHIP EXPERIENCE

IEEE Power & Energy Society (PES), MMU Student Branch *2023 – 2026*

Chair (2025–2026) · Head of Logistics (2023–2024)

- Led the student chapter's committee and operations as Chair, planning and delivering technical, professional, and student-focused activities and coordinating with external organizations and industry partners.
- Previously managed venue booking, transportation, and event-logistics planning as Head of Logistics across multiple chapter events.

IEEE Multimedia University Student Branch — Secretary *2023 – 2024*

- Managed the Secretarial Department: event planners, the term planner, event proposals/reports, and IEEE VTools submissions.
- Served as primary point of contact for the Secretarial Department, guiding the Assistant Secretary and Secretarial Officers.

International Student Society (ISS), MMU *2023 – Present*

Administration Officer (2025–Present) · Vice President (2024–2025) · Secretary (2023–2024)

- Serve as Administration Officer, managing administrative documentation, proposals, and committee communication, and contributing to the planning and execution of large-scale ISS events.
- Previously served as Vice President, supporting society-wide leadership and coordinating across Marketing, Media, Logistics, Sponsorship, Protocol, Communications, and Student Welfare divisions.

iEXPO — International Cultural Expo, MMU *2024 – Present*

Secretary, iEXPO 2024 · Secretary & Assistant Director, iEXPO 2025 · Advisor, iEXPO 2026

- Served as Secretary for iEXPO 2024, supporting event planning, documentation, and committee communication.
- Served as Secretary and Assistant Director for iEXPO 2025, co-leading planning across embassy/ministry invitations, ~25 country representatives, ticketing, and marketing logistics.
- Advising the iEXPO 2026 organizing team, sharing institutional knowledge from 2025 while supporting the new leadership.

ADDITIONAL LEADERSHIP & EVENT MANAGEMENT

- UNITEN Benchmarking Initiative — Founder & Director (Jun 2026): originated and led a cross-university benchmarking visit with Universiti Tenaga Nasional, from outreach through execution.
- MMU World Cup 2026 — Advisor & Emotional Support (May 2026): guided the organizing team through planning and high-pressure moments, drawing on prior event-leadership experience.
- Tesla Industrial Visit (Tesla CyberJ HQ) — Organizing Committee (Apr 2026): supported planning, logistics, and student coordination for an industry site visit.
- International Student Society — recurring organizer for ISS Welcoming Night, AGMs, committee recruitment, Committee Bonding (Port Dickson), Promotion Week, and KL Treasure Hunt Day; also contributed to TEDx MMU and MAGNET event committees.

TECHNICAL PROJECTS

- Wearable Fall Detection Belt for the Elderly — ESP32 + MPU6050 IMU with Blynk app integration for real-time monitoring and caregiver alerts.
- Cisco Packet Tracer Network Project — designed multi-VLAN topology with inter-VLAN routing and standard/extended ACL security policies; documented troubleshooting and verification.

VOLUNTEERING

- MOHE Career Fair 2025 (under Talentbank) — Volunteer: helped organize the event as part of the volunteer team, gaining hands-on event-organizing experience and connecting with people from diverse backgrounds.
- IEEE GLOBECOMM — Volunteer (Dec 2023): supported event logistics with the Whova team; engaged with international industry leaders.
- Pertandingan Robotik Kebangsaan — Mentor & Time Keeping (Sep 2024): mentored teams and managed timing for a 200-school robotics competition.
- MUST MMU Team, SMK Seri Permaisuri — Volunteer (Nov 2023): educated students and teachers on IoT applications for smart farming.

SKILLS

Programming: Python, C, Java

AI / Machine Learning: Deep Learning, Computer Vision, Image Classification, Transfer & Ensemble Learning, Explainable AI (Grad-CAM), Model Evaluation

Data / BI: Power BI, DAX, Data Cleaning & Analysis, Data Visualization, Pivot Tables, Semantic Models, Dashboarding

Networking: Cisco Packet Tracer, VLAN & Inter-VLAN Routing, ACL Security, Network Troubleshooting

Embedded / IoT: ESP32, MPU6050, Blynk, Sensor Integration, Real-Time Monitoring

Professional: Leadership, Project & Event Management, Stakeholder Coordination, Public Speaking, Documentation

Languages: Arabic (Native), English (Fluent)

CERTIFICATIONS & TRAINING

- AIGPE™ Certified Six Sigma White Belt — Advanced Innovation Group Pro Excellence (AIGPE™), Sep 2025
- Microsoft Power BI for Advanced Data Transformations — Udemy, Sep 2025
- Data Analysis Real World Use-Cases – Hands on Python — Udemy, Sep 2025
- Cloud Basics for Data Professionals — Udemy, Aug 2025
- Project Management Fundamentals — Aventra Group internship training
- GDPR Training — Aventra Group internship training
